

RedBush Technologies

209 ,Unitech Arcadia ,South City Sector 49 , Gurgaon.122018

PH : 9971483222 / 9718212607

Course Name: Microsoft BI

Duration: 2 months

Normal Track-MON-FRI (2 hrs each day)

Weekend Track- SAT-SUN (3 hrs eachday)

Faculty: Mr. Suresh Kumar

Introduction to MSBI

- What is BI and MSBI
- Importance of MSBI in the current Enterprise.
- Installation Steps and requirements.
- ETL and OLAP Tools
- Features of MSBI

Introduction to SSIS

- What is SSIS and use in the enterprise.
- SSIS Architecture
- Control flow architecture
- Data flow architecture
- Data pipeline
- Packages

Developing SSIS Solutions and Packages

- SSIS Solution and Project Creation.

- SSIS Package Creation.
- Connection Managers and Shared Data Sources.
- Control Flow Tasks
- Data Flow Task [ETL]
- Variables and Expressions
- .NET scripting in SSIS

Data Flow Tasks and Transformations

- Objectives of Data Flow Tasks.

- Transformations...

- Aggregate Transformation.
- Merge Transformation.
- Merge Join Transformation.
- Union All Transformation.
- Multicast Transformation.
- Conditional Split Transformation.
- Lookup Transformation.
- Fuzzy Lookup Transformation.
- Derived Column Transformation.
- Copy Column Transformation.
- Data Conversion Transformation.
- Sort Transformation.
- Merge Vs Union All

Control Flow Tasks

- Working with Control Flow Tasks and Containers.
- For Each Loop.
- For Loop
- File System Task.
- Execute SQL Task.
- Analytical Processing Task.
- Transfer Database Task.
- Backup Database Task.

- Sqlserver transformation Task.
- Agent Task.
- Script Task.
- Execute Package Task. Etc...

Errors and Debugging SSIS

- Various ways of debugging SSIS Package
- Data viewers.
- Configure Error output
- Execution Logging

Logging, Events and Configurations.

- Various ways of Configuring SSIS Package
- Using check points
- Implementing Transactions
- Logging ETL Operations and Log Providers.
- Various Events involved in the execution of Packages.

Bottlenecks, Performance Tuning

- Monitoring and Optimizing Packages.
- Various ways to identify bottlenecks.
- Tuning Source Tasks.
- Tuning Destination Tasks.
- Tuning in Package level and System Level.

SSIS Administration

- Various ways of Deploying SSIS Package.
- Flat file Deployment.
- Sql Server Deployment.
- Security
- Manually Executing SSIS Package
- Scheduling SSIS Package
- Importing and Exporting Packages

Introduction to SSAS

- Dimensions
- Facts

- Data Sources
- Data Source Views

Developing Cubes

- Cube Designer
- Partitions and Aggregations
- Dimension Usage
- Calculation and Kpis
- Perspectives, Actions
- Translations
- Write-back feature

MDX Language

- Axes, Slice
- Tuple and Set
- MDX Queries
- MDX Expressions
- MDX Scripts

SSAS Administration

- Installation
- Configuration
- Deployment
- Processing
- Security
- Backup and Restore

SSRS Architecture and Components

- What is SSRS, Need of Reporting Services
- SSRS-2008 additional features
- Enterprise Report Life Cycle

SSRS Administration and Management

- Working with RS Configuration Tool
- Report Manager/Server/Database Creation
- Authenticating Manager/Server/Database
- RS Server starting and stopping

Report Creation and Authoring

- Working with various report facilities
- Report Server Wizard
- Report Server Project
- Report Model Project
- Report Builder
- Creating different reports and managing
- Table
- Matrix
- Chart
- List
- Gauge
- Sub Report
- Formatting
- Map
- Bar

Working with Reports Extensively

- Creating a report by connecting to
- OLAP cubes
- RDMBS
- XML Sources
- Excel Sources
- Stored Procedures
- Creating Sub Report and using it
- Working with
 - Sub Totals/Full Totals
 - Page Breaks
 - Page Footer/Header
 - Table Header/Footer
 - Sorting & Grouping
 - Applying Colors, Fonts etc

Working with Drill Down, Drill Through

- Creating Drill Down & Through reports
- Various ways to create and manipulate

Adhoc Reporting, Report Builder

- Creating and working with report model
- Report Builder and various options, features

Actions, Expressions & Variables

- Implementing various Report Actions
- Working with various expressions
- Variables (Report and Group)
- Calculated members, Query fields

Parameterised Reports

- Passing Parameters
- Non Queried
- Queried
- Multivalued
- Cascading Parameters

Publishing and Executing Reports

- Executing the Reports
- Creating cached Instances
- Creating snapshots and report history

Creating Subscriptions & Optimization

- Normal, Data Driven, Null Subscription
- Email and File Share Delivery Tuning of SSRS, Components and Query
